

As companies grow, their infrastructure often becomes overwhelmed, leading to noncompliance and inefficiencies. Administrative teams struggle to maintain compliance registers and documents, causing operational bottlenecks, increased risk, and higher costs.

SolidQMS offers a tailored, efficient, and lean infrastructure that streamlines compliance management, reducing administrative burdens and costs. This allows your team to focus on core business activities while maintaining robust compliance.

KEY BENEFITS

PROCESS OPTIMISATION

Embed a robust infrastructure to manage processes based on best practices and standards founded on the Plan-Do-Check-Act cycle.

COST REDUCTION

Keep your teams small by reducing administrative waste, ensuring all compliance records are accurate and complete, and focusing on the right data.

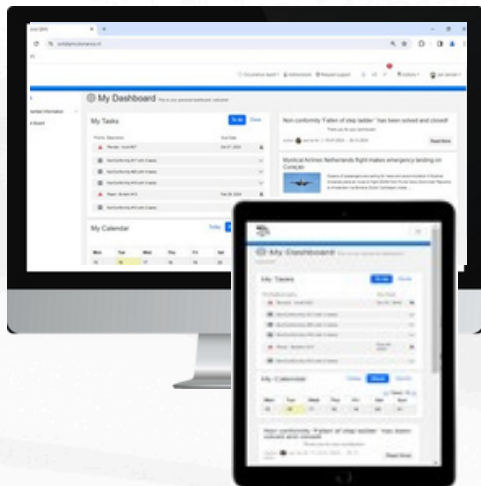

COMPLIANCE

Stay in control of compliance at all times, earning trust from your customers and regulators and always be ready for an audit.

SINGLE SOURCE OF TRUTH

Centralise all documents and provision of information ensuring a single source of truth enabling all employees work with the same accurate information.

Welcome to SolidQMS

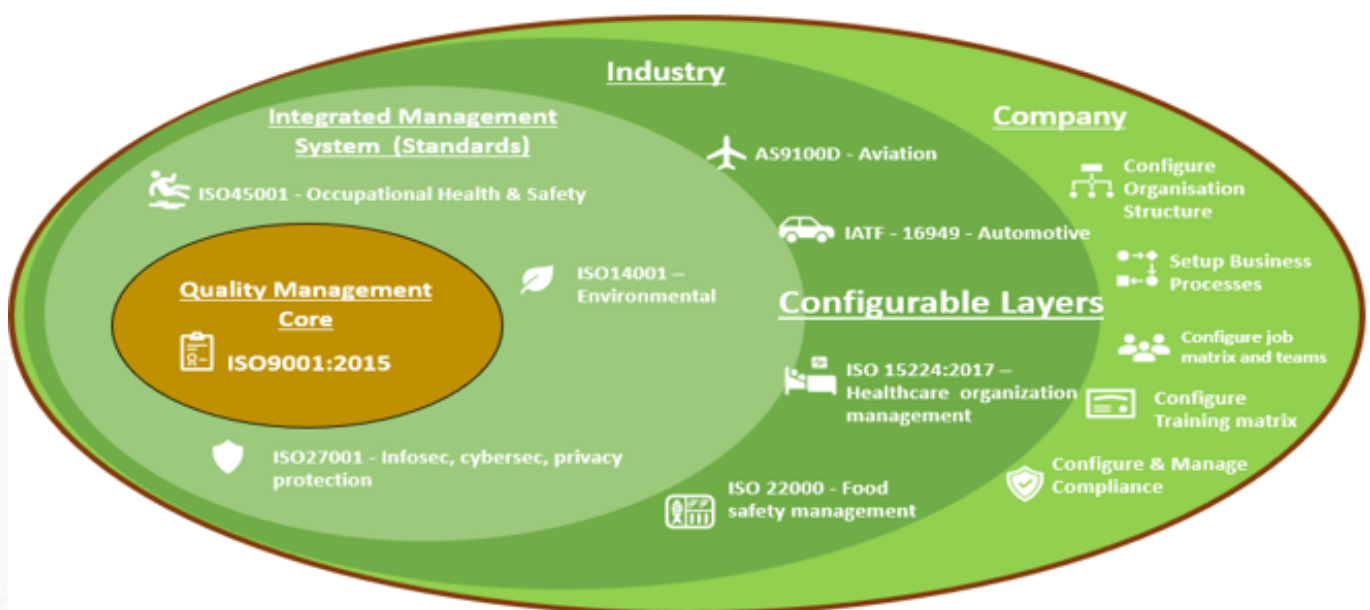

SolidQMS is a cloud-based Quality Management Solution designed to streamline operations and uphold the highest quality standards.

Whilst other solutions focus on administration of compliance, our solution emphasises on the process, with compliance records as a natural output.

This process focus lets your employees focus on what truly matters – your product or service. Reduce costs on administration and compliance errors, let SolidQMS worry about your compliance records. Built on proven management models, our solution integrates industry best practices, including ISO standards and specific regulations, ensuring compliance and offering advanced reporting capabilities. With a modular architecture based on the Plan-Do-Check-Act (PDCA) cycle, SolidQMS features six modules that ensure

standardised quality management. Each module allows you to define policies, identify requirements, execute processes, and automatically collect evidence. Intuitive dashboards and robust analytics provide valuable insights, driving business continuous improvement.

Just like an avocado's pit is its heart, ISO 9001 forms the core of SolidQMS. With configurable layers, the design adapts to specific business needs and can transform easily from a quality management system into an Integrated Management System (IMS), incorporating essential standards such as ISO14001, ISO45001, ISO27001 and meeting industry-specific requirements across diverse fields, from automotive, aviation to healthcare and construction.

Product Features

SolidQMS is a comprehensive quality management system designed to streamline and optimise various processes within an organisation. It consists of six distinct modules, each addressing specific aspects of quality management.

Documented Information Module

Organise documents efficiently with customised libraries tailored to your organisation's structure, providing a single source of truth. Ensure data integrity and security through robust version and access control features, including approval control. Quickly locate information using powerful search capabilities.

Human Resources Module

The Human Resources Module streamlines HR management by centralising employee records, document management, job matrices, and role qualifications. Maintain detailed employee data, securely manage digital documents, clarify job structures, and match skills to roles for better efficiency and development.

Competency Module

Easily align job qualifications with roles for optimised performance, streamline training programs, and keep records up-to-date effortlessly. Ensure compliance and awareness efficiency by bulletins with acknowledgment tracking through Read & Sign.

Quality Module

The quality module seamlessly integrates audit management, incident management, actionable findings, trend analyses, and comprehensive reports for stakeholders.

Communication Module

Keep your staff connected and informed through the Communication Module. Easily access company news, announcements, and essential resources directly on the employee landing page

Leadership Module

The Leadership Module streamlines leadership and team management with tools for managing organisational charts and teams.

Services

Our expert implementation services ensure SolidQMS seamlessly integrates into your operations. Whether a small business seeking ISO certification or a large corporation optimising efficiency, our dedicated team guides you every step. We provide comprehensive support tailored to your needs, from planning and configuration to training and consultancy. With proven expertise in quality management, we streamline implementation for compliance and maximised benefits. Trust us as your partner for quality excellence and continuous improvement.
